COLD STORAGE TRACKER

Full end to end solution to monitor an asset with global coverage

- ✓ Small and affordable, can easily fit inside a box
- ✓ Location tracking with geofencing & route deviation alarm
- ✓ Environment and temperature monitoring
- ✓ Monitor asset status with alarm for abnormalities
- ✓ Use multiple sensors within one container
- ✓ Program alarm: open box, route deviation, temp, collision
- ✓ Live portal: delivery data, time of arrival, historic data

Technology: NB-IoT / 2G

Size: 123 x 61 x 8mm

Battery: 1 Years Standby

Weight: 85g

3 months uptime @1 report per hour

Temperature Monitor

WiFi / GPS GLONASS / Beidou / LBS

3M Adhesive Installation

- ✓ Runs off the dedicated IoT network which means it can work at ultra low power levels extending the battery life by 80%
- ✓ Temperatures can vary inside a container, so to help monitor accurately place multiple sensors spread throughout the area
- ✓ Always see if they have been moved and find their new location instantly

SureMDM

Global MDM solution for management of devices

Our Wireless Asset GPS Tracker uses an intuitive and powerful MDM solution and MDM app for Android, iOS/iPadOS, Windows, Linux, macOS, Wear OS, VR, and IoT platforms. Avoid security risks and solve maintenance challenges during all phases of the device's lifecycle.
